BAIE- D'URFE, QC

DEAR HIRING MANAGER,

I am writing to express my interest in the analyst Genetic Toxicology at ITR Laboratories Canada Inc as advertised. With a Master's degree in Chemical Engineering from Ecole Supérieure Polytechnique d'Antananarivo and extensive hands-on experience in biological testing, phytochemical screening, and product analysis, I am excited about the opportunity to contribute to your team.

During my internship at the Centre National de Recherches sur l'Environnement (CNRE), I conducted various biological activity tests, including antimicrobial and antioxidant assays. This experience honed my skills in performing complex analyses and reinforced my ability to maintain laboratory equipment while ensuring compliance with safety standards. Additionally, I have experience executing acute toxicity tests and anti-inflammatory activity tests at Centre National d'Application des Recherches Pharmaceutiques (CNARP), which aligns well with the responsibilities outlined for this role.

I am particularly drawn to ITR Laboratories Canada Inc because of its commitment to quality and innovation in chemical analysis and product development. I am eager to assist in setting up and conducting chemical experiments, developing sampling programs, and compiling records to interpret experimental results. My proficiency in analytical techniques, including Gas Chromatography (GC) and essential oil extraction, will enable me to contribute effectively to your research initiatives.

I have a conversational level in English and French, which allows me to communicate effectively in diverse environments. My leadership experience as President of AREPA (Association Religieuse des Etudiants Polytechniciens Adventistes) has equipped me with strong organizational and teamwork skills, essential for collaborating with colleagues in a laboratory setting. I am enthusiastic about the possibility of joining ITR Laboratories Canada Inc and contributing to your innovative projects. Thank you for considering my application. I look forward to discuss how my background, skills, and enthusiasms align with the goals of your team.

Warm regards,

Ny Oliva AINAHARILALA
