COMPETENCES

- Organized
- Ambitious
- Hardworker
- Serious
- Sens of responsibility
- Focused
- Leader-like
- Team spirit
- Capacity to adapt
- Quick learner
- Adaptable to new skills

LANGUAGES

- English
- French

SKILLS

- Word
- Excel
- Powerpoint
- Chemdraw

ACTIVITIES

- Sport
- Choir
- Social media

PROFIL

As an ambitious and responsible, having highly organised and committed to achieving goal with precision. Adapting quickly and learning efficiently a new challenges. Known for my serious and hardworking , I am dedicated to continuous improvement and delivering result that align with organizational objectives.

My strong sense of responsibility provides me to work proactively, ensuring task and completed on time.

PROFESSIONAL EXPERIENCE

INTERNSHIP CNRE LABORATORY

2022-2024

CNRE (Centre National de Recherches sur l'Environnement), Antananarivo

Antimicrobial activity test

- Preparing solution or dilution of microbial agents to be tested
- Inoculating extract-impregnated disc with bacterial or fungal strains
- Determining inhibition zones and analyzing the effectiveness of antimicrobial agents
- Cleaning equipment and ensuring the lab is organized

Antioxydant test (using the DPPH method and spectrophotometric analys)

- Preparing samples test and DPPH solution, performing incubations, and using a spectrophotometer to mesure absorbance
- Analyzed results to determine the antioxydant potential of various extract
- Determine the IC₅₀ . Cleaning and maintaining the lab environment

Anti-larvicidal activity test

- Collecting and preparing larval samples, as mosquito larvae for testing
- Applying different concentration of larvicidal agents, and monitoring larval mortalit over time.
- Determine LC₅₀. Cleaning and maintaining the lab environment

Photochemical Screening

- Identify the major chemical families with laboratory protocol
- Keeping the lab organized and cleaned

Plant extraction

- Collectiing the plant materials and prepare them for extraction
- Select extraction methods, and preparing the solvents
- Doing the extraction process according to established protocols
- Filtration and evaporation. Maintaining the lab environment to be clean

TLC (Thin-Layer Chromatography)

- Preparing solvent system and TLC plates with applying small spots of the sample
- Place the TCL in developing chamber
- Mesuring the retention factor (Rf) and keep all results
- Cleaning equipment and ensuring the lab is organized

CLPB (Low Pressure Liquid Chromatography)

- Preparing column with stationary phase and select mobil phase
- Applying the prepared sample on silica gel onto the column
- Monitoring the elution process and collecting the fractions
- Analised fractions with TLC
- Cleaning equipment and ensuring the lab is organized

Product isolation and Purification with LH20 and TLC

- Preparing column with LH20 as stationary phase and selecting solvent system appropriate
- Load the sample onto the column and monitoring the elution then collecting the fractions
- Purify the fraction by TLC with 3 different solvent systems
- Cleaning equipment and ensuring the lab is organized

Ny Oliva

AINAHARILALA

EDUCATION

- 2024

Master's degree in Chemical Engineering

ESPA (Ecole Supérieur

Polytechnique d'Antananarivo)

- 2023

English Study

English Learning

- 2020

Certificate A₁ and A₂ in ESOL

LanguageCert

International ESOL

- 2019-2020

English Study

MPTC (Madagascar Professional Training Center)

- 2019

Laboratory work

Chimie Organic Laboratory

Vontovorona Antananarivo

- 2017-2019

Master program in Chemical Engineering

Specialized in Science and

Technology of Bioactive

Products

ESPA (Ecole Supérieur

Polytechnique d'Antananarivo)

- 2018

Laboratory work (oil exaction, essence oil exaction,...)

Chimie Organic Laboratory

Vontovorona Antananarivo

- 2018

Bachelor's Degree in Chemical and Industrial process Engineering

ESPA (Ecole Supérieur

Polytechnique d'Antananarivo)

- 2014-2017

Bachelor program in Chemical Engineering

Engineering Science

ESPA (Ecole Supérieur

Polytechnique d'Antananarivo)

INTERNSHIP CNARP LABORATORY

02/2021- 04/2021

CNARP (Centre National d'Application des Recherches Pharmaceutiques)

Acute Toxicity test

- Preparing the animals materials and the sample test
- Helping with administering the test substance to animal as following the protocole OECD (Organisation for Economic Co-operation and Development)
- Determining LD₅₀ with GHS. Keeping the lab organized and cleaned

Antiinflammatory activity test (Orale and Locale Application)

- Preparing the substance to be tested and the animal material
- Helping with including inflammation by injection of carrageenan
- Mesuring edema size
- Applying substance by orale administration or external application
- Keep mesuring edema and determining inhibition percent
- Cleaning equipment and keeping the lab organized

INTERNSHIP IMRA LABORATORY

11/2018 - 12/2018

IMRA (Institut Malgache de Recherches Appliquées)

Essential oil extraction

- Collecting the plant material for extraction, ensuring freshness
- Preparing equipment for distillation
- Monotoring the extraction process
- Separating the oil. Keeping the lab organized and cleaned

Gaz Chromatography (GC)

- Preparing standards and calibration solution for GC
- Setting up th GC, ensuring equipments supplies connected and functonal
- Inject samples into the GC and observing the process and keeping notes
- Helping identify peaks by comparing retention times with known standards
- Cleaning the injector port and equipment. Keeping the lab organized

A W A R D S A N D H O N O U R S

- Certificate « **The Order of Engineers of Madagascar** » 2024
- Engineer's oath during graduation ceremony
- Certificate of **graduation « Promotion 2018 »** 2024
- Certificate of **Leadership award « Pro Academic 2019 »** 2019

Andrews University (USA) and **ACAU** (Association Chretienne Adventiste Universitaire) as President Advisor of ACAU.

First conference « Pro Academic 2019 » in Antananarivo Madagascar as Presentations of Andrews University Students and Projects Exhibitions of Antananarivo University Students.

- Certificate « **Jury's favorite» of ESPA Exhibition** 10/2017

Orientation Exhibition of ESPA as Chemical Engineering Project Commission.

Doing presentation in front of public as our project is transformation of coconut oil into diesel.

Booth competition each all field of ESPA

I M P L I C A T I O N

PRESIDENT

2018-2019

AREPA (Association Religieuse des Etudiants Polytechniciens Adventistes), Antananarivo

- Leading meeting
- Motivate member to contribute actively and guide the association towards acheving its missions
- Implement projects and all activities
